

Senior Consultant, HEOR

Company: PRMA Consulting Ltd

Location: Fleet, Hampshire

Type: Permanent

Salary: On application, and commensurate with experience

Benefits: Competitive salary, performance-related bonus, pension, life insurance, private healthcare, group income protection, perkbox (discounts including shopping, cinema and restaurants), flexible working

PRMA Consulting is a fast-growing company specializing in the pricing, reimbursement and market access of pharmaceuticals. We work with our clients to deliver strategic solutions that maximize the market opportunity for their products. This can involve formulating health economic outcomes and pricing strategy, and building and communicating evidence-based value propositions across international healthcare systems.

We are headquartered in the UK, with offices in the UK, US, and Greece, and country experts around the world. Our clients include the top 20 global pharmaceutical companies, and biotechnology, medical device, and diagnostic companies.

PRMA Consulting provides a stimulating and challenging work environment, and clear career progression for self-motivated talented individuals. We have a strong focus on quality and encourage all our staff to take ownership and responsibility of projects whilst working across and within teams.

We are seeking a senior health economist who can help to design and conduct studies in health economics and outcomes research modelling to support our 2016/17 business plan. This will include supporting senior staff in the management and oversight of project activities, as well as being involved hands-on in project delivery. The Senior Consultant will be expected to take a leadership role also in maintaining the quality of projects. The projects that we deliver provide solutions to the most cutting-edge market access challenges in the industry.

Duties and responsibilities of the role

The Senior Consultant will organise and effectively lead project teams of consultants, analysts and external associates in the development and delivery of global research projects, this will involve:-

- Providing high quality insight and guidance to project teams.
 - Participating actively in core elements of projects, including client liaison, development of project-specific discussion guide materials, selection of key payer decision makers, undertaking payer discussions, input to analysis and presentation development, delivery of project results
-

- Support the development of internal standards for technical health economics and outcomes research projects, and support development and knowledge sharing amongst the consulting team

In general, the role will contribute to the following projects depending on expertise:-

- economic modelling of cost-effectiveness, and budget impact
- preference elicitation and utility studies
- healthcare resource use and costing studies
- design and analysis of pre-launch and post-launch real-world observational studies
- strategic input into HTA and P&R submissions
- HEOR strategy development and input to clinical trial design

The Senior Consultant will also pro-actively support the business development activities, including client engagement and account management of the growing client list.

Requirements

We are looking for candidates with an outstanding academic background who are confident operators at all levels. The successful candidate must possess a post-graduate qualification in a relevant scientific, medical or economic discipline.

More specifically, we are looking for:

- Experience within health economics and decision science, ideally within the consulting or pharmaceutical sector and with client-facing experience
- Demonstrable experience of building evidence-based value propositions across different healthcare systems and making submissions to P&R and HTA agencies
- Demonstrable experience of how to define, create and communicate product value
- Demonstrated experience in undertaking health economics or economic modelling
- Demonstrated understanding of health technology assessment and economic evaluation
- Outstanding work ethic and commitment to delivering timely high quality work
- Exceptional attention to detail
- First-rate written and verbal communication skills
- Experience of project management and line management
- Experience presenting papers at national or international conferences

Technical skills

- Competence in using analytical software (TreeAge, WinBUGS, SAS, Simul8, R, Excel, etc.) to undertake decision analysis, meta-analysis, Markov modelling or microsimulation
- Advanced Excel modelling skills, including VBA
- ITC/NMA capabilities would be an advantage or at least some familiarity with these concepts

We offer rapid career enhancement and personal development for the right candidate, along with the opportunity to work alongside an international and diverse group of talented professionals.

Application

If you feel you have the skills and experience to add value to our team then please forward your CV and a covering letter to jobs@prmaconsulting.com also stating your current or expected salary package.
